<b>Blackleg:</b>	R
<b>Harvestability:</b>	Excellent
<b>Maturity<sup>1</sup>:</b>	+0.5 days

## 6050RR

### Mid-maturity Performer at a Value Price

6050 RR is a mid to early maturity hybrid with good yield performance across the three canola production zones. It is resistant to blackleg and has very good standability. It is well-suited to all production areas but is particularly well-suited for the shorter season production areas. In two seasons of the BrettYoung Comparison Trials (BCTs<sup>3</sup>), 6050 RR provided a 3% yield advantage over the checks. 6050 RR is value priced this coming season.

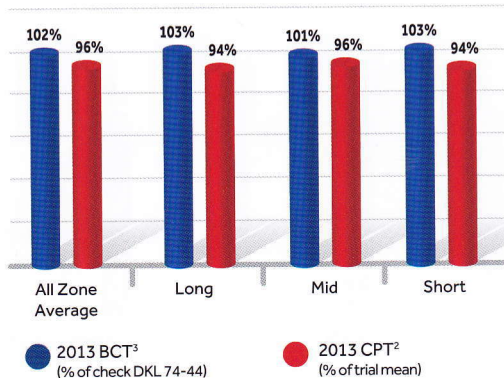

## 6040RR

### Proven Performer and Value Priced

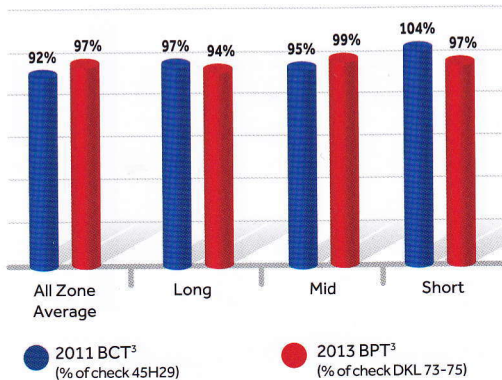

6040 RR continues to prove itself as a consistent yield performer in the Genuity® Roundup Ready® segment. 6040 RR has excellent standability and thus ease of harvest. 6040 RR is value priced for this coming season.
