

Prograin®

# Kosmo R2

GENRR2Y 2450 CHU (RM 00.5)

The variety to choose to obtain good yield in early maturity areas

## CHARACTERISTICS

- Very good vigour at the beginning of the season, perfect for short season areas
- Good ability to branch for an early soybean variety
- Plant taller than the average with good standability
- Good flower fertility that ensures good yields

## MANAGEMENT POINTERS

- Offers better results in narrow rows

Standability	7
Plant type	6
Plant height	8
Sclerotinia tolerance	8
Stability / adaptability	8
Vigour for no-till	N/A
Adaptability to 30"	5
IDC	8

### KOSMO R2

FIELD SCALE VARIETY TRIALS - 2016 | PLANTING RATE: 210,000 PLANTS/ACRE | MOISTURE CORRECTED TO 13%

VARIETY	DTM	YIELD - BU/ACRE	PLANT HEIGHT	STANDABILITY
Torro R2	107 days	46.8	Med-Tall	Very good
NSC Watson	109 days	43.2	Med	Very good
DKC 23-60	112 days	42.0	Med	Excellent
TH 33003R2Y	113 days	47.3	Very Tall	Good
TH 32004R2Y	115 days	46.0	Med-Tall	Excellent
Kosmo R2	115 days	50.8	Tall	Very good
Dylano R2X	117 days	50.2	Med-Tall	Excellent
Dugaldo R2X	118 days	50.0	Med-Tall	Excellent
Domingo R2X	120 days	52.5	Med-Tall	Excellent
Astro R2	122 days	49.6	Tall	Excellent
